Summary

Full Stack Developer with 3+ years of experience building scalable **FinTech and enterprise applications** using **Angular, React, Typescript, Java, Spring Boot, Node.js, REST APIs, and Microservices**. Experienced in developing responsive frontend applications, integrating RESTful services, implementing complex business workflows, and building scalable backend services for **digital payments and financial platforms**. Strong hands-on experience with PostgreSQL, Oracle, Redis, Kafka, Git, Jenkins, and CI/CD with experience working across frontend, backend, API integration, and production environments.

Skills

Programming Languages: Java, JavaScript, SQL

Frontend: Angular, React, TypeScript, HTML5, CSS3, Bootstrap, Responsive Web Design

Backend: Spring Boot, Spring MVC, Hibernate, JPA, Servlets, JSP, REST APIs, Microservices

Frontend: Angular, React, TypeScript, HTML, CSS, Bootstrap

Databases: Oracle, PostgreSQL, MongoDB, Redis,

Messaging: Kafka, RabbitMQ

Cloud: AWS S3, IAM, EC2, Lambda, Glue, SNS, SQS

Security: Vault, OAuth 2.0, Spring Security, JWT, Encryption, Tokenization

Developer Tools: Git, GitHub, Maven, Postman, Swagger, IntelliJ IDEA, VS Code, Tomcat

Core Concepts: REST APIs, JDBC, OOP, Collections, Multithreading, JWT Authentication

Experience

Senior Engineer – Full Stack **Dec 2025 – Present** *Comviva* *Java, Spring Boot, Oracle, Redis, React*

- Implemented frontend features, **API integrations, form validations, reusable components, and business workflows** across enterprise applications.
- Built and supported **P2P, B2B, Wallet-to-Bank and C2C payment APIs** for a large-scale digital wallet platform serving **10M+ users**, maintaining **<200ms p95 API latency** and **99.95% uptime**.
- Designed and developed scalable **Java and Spring Boot microservices** for high-volume financial transactions, contributing to a payment platform processing **2B+ transactions annually**.
- Optimized **Oracle and PostgreSQL** queries through indexing and execution-plan analysis, and implemented **Redis caching**, reducing API **p95 latency by 40%** while maintaining **99.95% availability**.
- Integrated **5+ external financial APIs** using REST and SOAP through Mule ESB, implementing contract testing and circuit-breaker patterns to improve integration reliability and reduce integration defects.
- Developed **Kafka-based asynchronous event pipelines** for real-time transaction and payment-status updates across mobile and web applications.

Engineer – Full Stack **Dec 2023 – Dec 2025** *Comviva* *Java, Spring Boot, REST APIs, Angular, JavaScript*

- Developed and supported backend services for a **MobiquityPay**, delivering features including **user onboarding, onboarding screening, banner management, and Favorites & Recents**.
- Developed and supported backend integrations for mobile payment features including **Agent Locator, Cash-In, and Cash-Out**, ensuring reliable communication with external services.

Trainee Engineer – Backend **Jul 2023 – Nov 2023** *Comviva Technologies* *Java, Spring Boot, REST APIs*

- Developed and supported **REST API integrations** for mobile payment workflows, gaining hands-on experience with API communication, request/response handling, and error handling.

Data Engineer Intern **Apr 2023 – Jul 2023** *Cognizant* *SQL, AWS S3, Lambda, Glue, Athena*

- Built a **student data analytics system** using **SQL and AWS services** including S3, Lambda, Glue, and Athena for data processing and analytics.

- Developed automated **ETL pipelines** to extract, transform, and process datasets for analytics and reporting.
- Implemented scheduled **data-integrity checks** to identify data inconsistencies and improve the reliability of processed datasets.

Projects

Dahabshil – Consumer Wallet Portal

Client: Dahabshil

Angular, TypeScript, REST APIs, PostgreSQL, Java, Spring Boot

- Developed and maintained the **Dahabshil Consumer Portal**, delivering customer-facing wallet and financial services across the application.
- Developed features covering **user registration, KYC, transfers, bill payments, recharge, and international remittance** workflows.
- Integrated frontend functionality with **REST APIs** and backend services to support secure and reliable financial transactions.
- Developed responsive and multilingual functionality to provide a consistent experience across devices and user requirements.
- Collaborated with cross-functional teams to troubleshoot integration issues, implement enhancements, and support production releases.

MobiquityPay – Digital Payments Platform

Comviva Product

Java, Spring Boot, PostgreSQL, Oracle, Redis, Kafka, Angular, React

- Contributed to the development and enhancement of **Mobiquity Pay**, a digital payments platform supporting high-volume financial transactions.
- Developed and supported backend services for **P2P, B2B, Wallet-to-Bank** payment workflows.
- Built scalable backend services using **Java, Spring Boot, REST APIs and microservices**.
- Implemented asynchronous processing using **Kafka** for transaction and payment-status updates.
- Optimized database interactions using **Oracle, PostgreSQL and Redis** to support high-volume transaction processing.

FREELANCE PROJECTS

OpenCredits - EdTech LMS Platform Backend Developer – Freelance

2026

Node.js, PostgreSQL, AWS S3, CloudFront, React

- Developed **responsive React (JavaScript)** front-end features for **Open Credits**, an online education platform. These included **course catalog, cart, checkout, and enrollment flows**, plus **student and affiliate dashboards**, built with **reusable components** and **Context API-based authentication**.
- Integrated **Stripe payments** and **REST APIs** through a **service-layer architecture**. Resolved UI bugs, fixed missing icons, and updated payment configuration, **improving the reliability of the checkout experience**.
- Built a Stripe integration for loan disbursement and EMI repayments- checkout sessions, subscription billing, **webhook signature verification** and refund flows with full audit logging.
- Designed a rule-based credit eligibility engine generating real-time lending decisions, resolved critical logic bugs ensuring **100%** score accuracy and unblocking the first commercial lending partner go-live.
- Designed database schemas and optimized SQL queries using **PostgreSQL/MySQL** to support application workflows and data management.

PROFESSIONAL DEVELOPMENT

- Expanding backend expertise in **Node.js and Express.js**, focusing on REST API development, asynchronous programming, authentication, and database integration.
- Exploring **prompt engineering, embeddings, vector databases, and LLM application architecture** for building AI-enabled backend applications.

Education

Bachelor of Technology (B.Tech)

Graduated: 2023 *KL University*

CGPA: 8.76 / 10
